

Creating Forms

What is the purpose of creating a form?

Forms are a type of landing page that allows partners to generate leads through form submissions. Partners can use forms to execute lead-generating marketing activities, such as email campaigns and banner ads from a single location. By using forms, partners can qualify, manage, and track leads as they are generated.

Forms may also include incentives, such as whitepapers, product brochures, and ebooks, to entice prospects to complete the form and become leads. These incentives can be gated, meaning only available after a form is submitted, or non-gated, meaning always available.

How do I create them?

When creating forms, start by copying an existing form to use as a framework. Be sure to select a form that mirrors the type of form you want to create. (In other words, the template you select should maintain the same structure as the previous version).

Once copied, update the content & images, form fields, and links within the content tab. Then create a confirmation page and email.

(**Note:** In this lesson, you practice updating several fields within a copied form of your choice. You will not update every field available.)

What will I do in this lesson?

By the end of this lesson, you will be able to do the following:

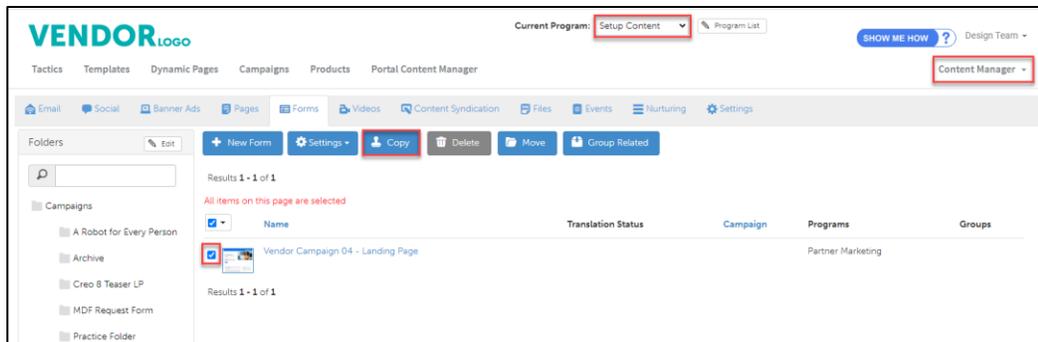

- [Copy a form](#)
- [Create form settings](#)
- [Edit banner content](#)
- [Edit body content](#)
- [Edit links & images](#)
- [Add a form field](#)
- [Create a confirmation page](#)
- [Create a confirmation email](#)
- [Publish Form](#) (This step is for **reference only**. Do not publish practice content created during this onboarding program.)

To complete this lesson, you must download the assets located within the [Building your Content](#) Block. Once downloaded, save each item to your local drive.

Steps

COPY EXISTING FORM

- 1 In **Content Manager**, from **Current Program**, select **Setup Content**.
- 2 From the **toolbar**, select **Tactics > Forms**. A list of existing forms appears.
- 3 Place a **checkmark** next to the form you want to copy. Then click **Copy**.

- 4 From the **folder** drop-down menu, select a **folder** to copy your form.

Copy and assign tactics

Give this new tactic a name and then select who you would like to assign this tactic to so they can update it and make any necessary changes.:
